CEILING & WALL SYSTEMS

Whether you are looking to improve the energy-efficiency or enhance the appearance of your facility, MBR can help make your dreams a reality.

INSULATED SYSTEMS

The easiest and most cost-effective way to lower utility costs is to add insulation.

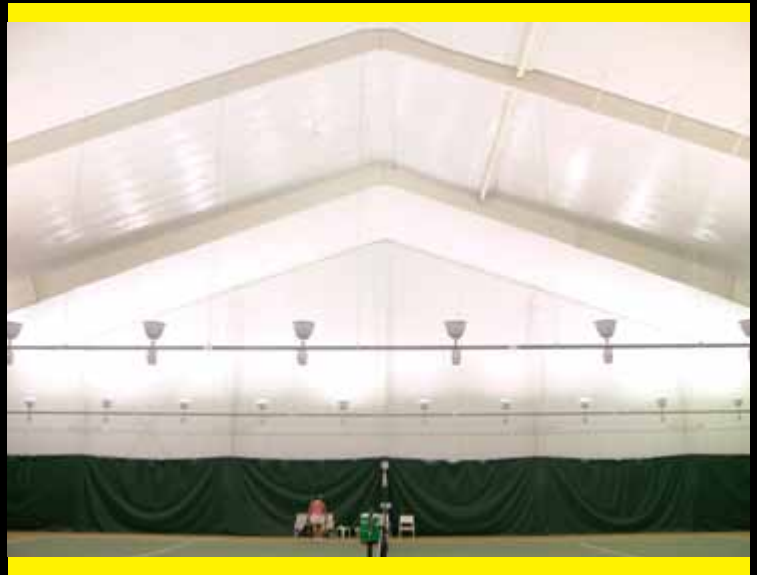

- **Lowers operating costs**
- **Improves acoustics**
- **Increases aesthetics**
- **Controls condensation**
- **Improves quality of lighting**

FACING-ONLY SYSTEMS

For those who don't need to add insulation, but are tired of dingy, torn interiors with poor lighting, MBR can help. MBR can cover any existing ceiling insulation system by simply re-facing your facility.

- **Improves lighting and overall appearance**
- **Fabric ceiling can even be dropped to cover all of the existing structural steel**

Metal Building Restoration uses professional, experienced installers capable of overcoming any difficulty or situation during installation. Crews are also available to install systems at night to eliminate interference during business hours.

REROOF SYSTEMS THE MR-24® ROOF SYSTEM

Save the cost of tearing off your existing roof by installing a Butler Metal Reroof System.

- Affordable
- Durable
- Energy Efficient

MBR can install a reroof system over virtually any roof type including built-up or single-ply roofs.

Why a Reroof System is the Best Choice —

Affordable: Eliminates removal and disposal costs. More savings through improved energy efficiency.

Longevity: Butler® roofs withstand decades of harsh sun, heavy rains, snow, ice and extreme temperatures with minimal annual maintenance.

Green Building: Butler roof systems are material-efficient and made from recycled material. They're also available in "cool roof" colors with a certified, highly reflective finish to reduce energy consumption.

Warranties: Butler Watertight Gold Warranty assures up to 20 years of weathertight protection and includes full-system coverage of roof trims, roof curbs, and pipe penetrations on a non-prorated basis during the entire warranty life.

Butler and Butler Builder are registered trademarks of BlueScope Buildings North America, Inc.

COURT ACCESSORIES

Complete the look of your sports facility with our quality line of tennis and multisport accessories.

MBR's back-drop curtain packages are installed on high tension wire which eliminates the "sag" that is prevalent in many facilities.

- Curtain packages available in a wide variety of colors.
- Split wing entries available to view courts before entering.
- California corners.
- Column pads and wall pads.
- Divider nets, tennis nets and posts along with windscreens are also available.

T-5 Fluorescent lighting can truly be customized to fit your facility's specific needs whether your clientele are recreational or professional caliber players.

- Significantly reduces energy costs
- Available in direct and indirect systems
- New Hybrid Direct/Indirect systems now available
- Utility rebate and incentive programs available in many areas with MBR staff available to help with the paperwork

WE ALSO REPAIR EXISTING CEILING AND WALL SYSTEMS

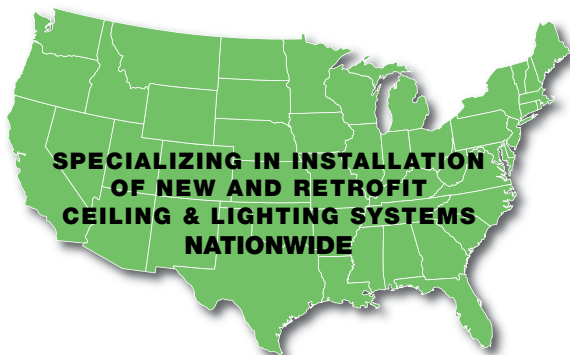

USE OUR EXPERTISE TO MAKE YOUR RENOVATION DREAM A REALITY.

“MBR’s crew did a fantastic job at our facility. They were prompt, courteous and went above and beyond my expectations. Their foreman was invaluable. He understood what we were looking for and delivered. I would recommend MBR to anyone looking to renovate their facility.”

~ Mark Figurella
Barrington Country Club

“MBR took me through the entire process of renovating my facility. They explored options with me regarding new insulation systems so I could make an educated decision about what would be best for my club. Midway through the project, I decided to upgrade my lighting, and they seamlessly worked this into the project. They were responsive, timely and courteous every step of the way. My club looks amazing — better than new — I started saving money on my utilities right away!”

~ Caron Zager, Owner
Club 1 Tennis
and Fitness Center

“I contacted MBR to identify economical alternatives to deal with wall insulation that had begun to show its age — and to install new curtains on a couple of courts. They were knowledgeable and creative in considering alternatives. Ultimately, they repaired the wall insulation, installed a high-liner curtain to protect the walls moving forward, and installed new curtains on the courts. The improvement is remarkable. They completed all the work at night without interruption to our members. We couldn’t be more pleased with MBR. Their expertise and friendliness made them an absolute pleasure to work with. We have already requested their assistance with additional improvements.”

~ Phil Tromans, G.M.
